

ELearn@Work is JWAY's new corporate elearning solution to provide on-demand, scalable, global consulting and development services for web-based learning courseware. ELearn@Work's elearning services are available as individual units or as integrated bundles — customized based on your objectives, priorities, budget and schedule.

A Proven Process

JWAY has customized its consultation and production processes to leverage our team's wealth of experience, best practices in elearning and the latest in web technologies. By involving the right people at the right time, managing on-point communication with the client and the SME (subject matter expert), then implementing proven methodologies, ELearn@Work solutions deliver on the mark. JWAY is able to deliver on-time focused learning for the workplace, while offering avenues for the development of engaged communities worldwide.

Solutions That Solve Problems

- **Strategic Learning Consulting** – Educationally sound instructional methods and learning designs are the most important components of web-based training. ELearn@Work solutions involve consultation with your enterprise on elearning strategies and plans.
- **Focused Content Development** – Technology provides an abundance of immediate information to the world, but not always what you need in the time you have. JWAY's ELearn@Work can help focus your content into online training material that is concise, effective and designed for delivery to a wide audience in a short period of time.
- **Online Collaboration and Growth** – Communities are defining today's products and services, affecting both the workplace and the classroom. ELearn@Work solutions can include enhancements for feedback, forums, and online communities that encourage student participation and create environments for new ideas.
- **Scalability and Maintenance** – ELearn@Work offers scalable solutions that can adapt as your elearning content evolves. Our company can work with you throughout your courseware development, allowing your knowledge base to grow based the needs of your enterprise.
- **Fast Turnaround** – Our company sets itself apart with rapid elearning development to ensure our customers meet their deadlines. ELearn@Work delivers customized on-time learning assets based on your objectives, priorities, budget, and schedule.

Our ELearn@Work Featured Services Include:

- > **Planning** and analysis of courseware structure and content.
- > **Capturing** digital screenshots of elearning material and recording voice and actions.
- > **Transcribing** and structuring raw content for migration into elearning courseware.
- > **Translating** and managing localization of original U.S. content for use in a multi-lingual elearning environment.
- > **Creating** interactive elearning modules using web technologies and other multimedia presentation and production tools.
- > **Developing** and encouraging communities as forums for feedback and idea markets for change.
- > **Maintaining** your existing ELearn@Work assets based on content updates, user testing and feedback.

An Integrated Infrastructure of Knowledge

Technology in the 21st century is an indispensable, enabling platform that allows learning and communication to take place in ways more beneficial to the individual and the enterprise. JWAY's ELearn@Work solution seeks to provide your company with components to supplement a comprehensive elearning roadmap that addresses the needs of a new generation of learners in the workplace. Tools such as interactive elearning modules, user registration, participant testing, lesson ratings, reporting, administrative functions, localization and social computing may be part of your elearning package. Contact JWAY today to learn about how our ELearn@Work solution can help your enterprise train and retain employees for enhanced productivity in the workplace.
